### **DETAILED ACTION**

1. This office action is in response to the amendment filed on June 16, 2006, in which claims 1-12 are presented for further examination.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. While clustering a string, wherein the string including a plurality of characters could reasonably be considered a tangible result, the body of claims 1, 4, 6 and 10 does not appear to actually support the preamble by including a step or steps which accomplish that act. The preamble of the claims set forth the use for clustering a string. However, the body of the claims does not perform what has been stated in the preamble. Applicant is advised to amend the claims to solve the 112 problem set forth in the claims.
